

## ENVIRONMENTAL

## COMMITMENT

As part of our commitment to becoming a more sustainable manufacturer, we will analyze our current practices, identify methods to make them greener, and implement those ideas.

## Supplier to Wind Farms

CPI is proud to supply OPGW Dead-Ends and Ground Grid Connectors to wind farms across the nation.

## Product Environmental Benefits

CPI's connectors are some of the greenest choices on the market today:

- High-performance, low-resistance
- Prevent loss of electricity during current transfer
- Reduce waste: no special tools required
- Reusable with installation of shear bolt

## Greener Manufacturing

- Buy raw material from domestic suppliers when possible
- Recycle waste from manufacturing processes
- In the process of acquiring solar panels on our roof
- Use environmentally-friendly cleaning products, from hand soap to detergents used in the manufacturing process
- Donate to environmental organizations
- Plant trees annually on premises
- 50% of employees ride public transportation

## Eco-friendly Office

When choosing supplies for our office, we give priority to products made of recycled and/or recyclable material, ranging from trash bags to paper. Speaking of paper, we prefer to communicate with our customers and suppliers via email or phone, rather than fax, to save paper. We also have an active recycling program.
